

NASSAU Alu Door System

High quality aluminum doors

NASSAU Alu Door System is a new type of separate pass doors which complement NASSAU 9000 Sectional Doors beautifully, because of its architectural appearance and high quality materials.

A high quality alternative

Because of the high quality at a low price, NASSAU Alu Doors are an excellent alternative to the NASSAU Thermo Doors, when very high insulation is unnecessary. NASSAU Alu Door System can be combined with NASSAU's well-known polyurethane foamed 90F-sections and with glass

fillings following the overview below. As a new option it is now possible to combine the foamed 90F sections with window type 90W or one-layered glass fillings. The NASSAU Alu Door is therefore a low-cost alternative to the NASSAU Thermo Door without compromising the quality.

NASSAU Alu Door System											
	Max. width	Max. height	90F-section ¹	90W-window ¹ (4 types)	Filling 4-18-4HG ²	Filling 6-14-6LAM ³	Filling 4HG ⁴	Filling 6LAM ⁵	Filling SI ⁶	Filling AI ⁷	Filling APS10 ⁸
Single door	1264 mm	2561 mm	✓	✓	✓	✓	✓	✓	✓	✓	✓
Double door	2464 mm	2561 mm	✓	✓	✓	✓	✓	✓	✓	✓	✓

8	3 mm powder coated aluminium with 10 mm square holes										

NASSAU 9000F sectional door and separate NASSAU Alu Door

Solid door hinges of the best quality

NASSAU quality solutions

To give the best possible aesthetic and harmonic solution the separate pass door should fit with the NASSAU sectional door. Therefore, we have ensured the best possible alignment of the horizontal lines in the two products.

NASSAU Alu Doors can be combined with a fixed over field, which is supplied with the same profile system as the door. As an option NASSAU Alu Door System can be ordered with powder-coated profiles.

Low door step is standard but there is also the option of having the door delivered with a special lowering gasket as bottom solution. Further advantages are the solid door hinges, the stylish glazing bead system and the effective drain system.

The doors can be right or left hinged, and outside or inside opening. The doors are produced individually for each customer. Contact our technical sales support for further information.
